

# REDUCING ENERGY COSTS IN A TIME OF EXPLODING ENERGY PRICES

## ABOUT HVACR TRENDS

The second edition of the HVACR Trends Event, organized by the ASHRAE Pakistan Chapter, will showcase state-of-the-art HVACR equipment, emerging technologies, and ancillary equipment and systems.

The conference will provide a unique and focused opportunity for HVACR professionals, equipment suppliers, Project managers, architects, builders, Teachers, and users, to have an in-depth understanding and analysis of price trends and energy costs, and how they can be reduced in new and existing buildings.

Participants can focus on an entire spectrum of equipment, as well as view and select products displayed. Buyers, sellers, users, and designers will also be able to connect and attend technical presentations on a wide range of energy cost reduction possibilities.

The conference will cover energy-efficient design, application of renewables in buildings, thermal storage, the role of insulation, operating strategies besides efficiency advances in equipment, and emerging technologies.

Panel Discussions will provide an opportunity for an in-depth discussion on the pros and cons of the various technologies, equipment applications, and operating strategies. Innovations and trends will also be highlighted.
